

Anthony Ostia

(626) 727-0002 | aostia815@gmail.com | anthonyostia.com | github.com/maroonedace | linkedin.com/in/aostia

Full Stack Software Engineer with five plus years building scalable web applications using React, Node.js, TypeScript, and PostgreSQL. Experienced in owning features across the full lifecycle, architecting reusable UI components, optimizing performance, and standardizing API design.

Technical Skills

Frontend: React, React Native, Next.js, TypeScript, JavaScript, React Query, Tailwind CSS, Zod, React Hook Form, Jest, React Testing Library, Cypress

Backend: Node.js, NestJS, Ruby on Rails, Redis, FastAPI, Python, PostgreSQL, Prisma, Supertest

Cloud & Tools: AWS (S3, CloudFront, IAM), Jira, Docker, Git, GitHub Actions, Cursor, Claude Code

Experience

Senior Software Engineer | Oceanside Perspective | Remote May 2024 - Present

- Architected and shipped a greenfield online learning platform using Next.js and Supabase, serving 80 to 120 students per quarter in a graduate level leadership course
- Built responsive, component-driven interfaces for authentication, search, and filtering
- Designed PostgreSQL schemas and built REST endpoints supporting pagination, filtering, and sorting, with indexing to optimize query performance
- Mentored junior engineers through code reviews and feature delivery while reporting biweekly user signup and flow metrics to inform board-level product decisions

Software Engineer II | NZero | Remote September 2021 - March 2024

- Built and maintained a scalable data management portal using React and TypeScript, serving 30+ enterprise clients tracking carbon emissions across multiple facilities
- Led UI redesign featuring interactive data visualizations, date range selectors, and streamlined filtering workflows, enabling users to reference reports directly within the platform
- Reduced data fetching load times by 60% by migrating from Redux to React Query
- Developed Ruby on Rails models and API endpoints serving emissions data to the frontend
- Expanded test coverage from 35% to 70% using Jest, React Testing Library, and Cypress

Projects

Castaway | Music Streaming Platform github.com/castaway-ace

- Implemented JWT authentication with rotating refresh tokens, per-device tracking, and hashed token storage for secure session management
- Designed a normalized PostgreSQL schema with Prisma, building admin endpoints to upload albums, writing metadata to Postgres and audio files to S3 in a single flow
- Developed a cross-platform mobile client using React Native, enabling users to browse, stream, and manage audio content

Criwin | Discord Bot github.com/maroonedace/Criwin

- Built and deployed a multi-server Python bot with slash command interactions, running on a Debian VM with 99.5% uptime

Education

UC San Diego | B.S. in Cognitive Science, Machine Learning & Neural Computation June 2020

AWS Certified Solutions Architect Associate | SAA-C03 April 2026
